Designed for heavy-duty performance, our **ND-2333 Bag Sealer** handles even the toughest jobs, securely sealing plastic or paper bags with twisted necks up to 0.24" (6mm) in diameter. The ND-2333 accommodates bags at various angles, featuring a 0.47" (12mm) throat to fit standard 3/8" PVC tape. It's an economical solution, sealing up to 2,000 bags per hour while using only 2" of tape per seal.

Constructed from durable cast aluminum, this dispenser boasts a built-in cutter and a stable, heavyweight base. With little assembly or maintenance required, simply load the PVC tape onto the 3" core wheel, and it's ready to go.

Simple Operation: Twist the mouth of the poly bag, slide it through the slot, and with a smooth downward motion, the tape automatically wraps around the neck and trims itself. If needed, excess bag material can be easily removed with a continuous downward pass through the built-in trimmer.

SPECIFICATIONS

TAPE TYPE	3/8" PVC PRODUCE TAPE
MAX ROLL / CORE DIAMETER	5.9" / 3"
MAX ROLL WIDTH	0.5"
DIMENSIONS (L X W X H)	10-1/2" X 6" X 8"
WEIGHT	4-LBS
