sealersales

Low Profile Value Unit - Ideal for Heavy Items

Poly Strapping
Not Included

- Fast warm up time (approx. five minutes)
- Easy to use control panel
- Tension range: 2-100-lbs
- Low profile unit ideal for heavier items (max load of 66-lbs)

Introducing our **SM-101-DA strapping machine** built to strap packages quickly and efficiently. From bundling to boxing, this machine handles every task with ease and efficiency ensuring your packages are securely strapped. The machine is ideal for heavier items as the unit is lower to the ground. Strapping cycle will automatically start when operator inserts strap. The machine will automatically shut down after a preset time to save electricity. We recommend this machine for a light industrial setting.
