Our **FRM-1120C** stainless steel horizontal band sealer has been a trusted workhorse in our product line for years, delivering consistent, reliable performance to meet demanding sealing needs. The FRM-1120C is suitable for sealing all types of thermoplastic materials and bags. The tilting seal head allows the machine to tilt 30 degrees, making it especially useful for sealing liquids. Constructed with durable stainless steel, the FRM-1120C is built for long-lasting performance and ease of use.

In addition, dry ink coding comes standard on this band sealer allowing you to easily print a lot code or expiration date directly on the seal line ensuring compliance and traceability. A solid-state digital temperature controller ensures that the seal bars maintain consistent temperatures, producing high-quality seals every time. The motorized rubber conveyor provides reliable speed control, and the machine's knurled pressure rolls offer variable pressure adjustment to accommodate different bag materials. Versatile and reliable, our FRM-1120C effortlessly seals a wide variety of materials including PE, PP, aluminum foil and more. Elevate your packaging game with the FRM-1120C today!

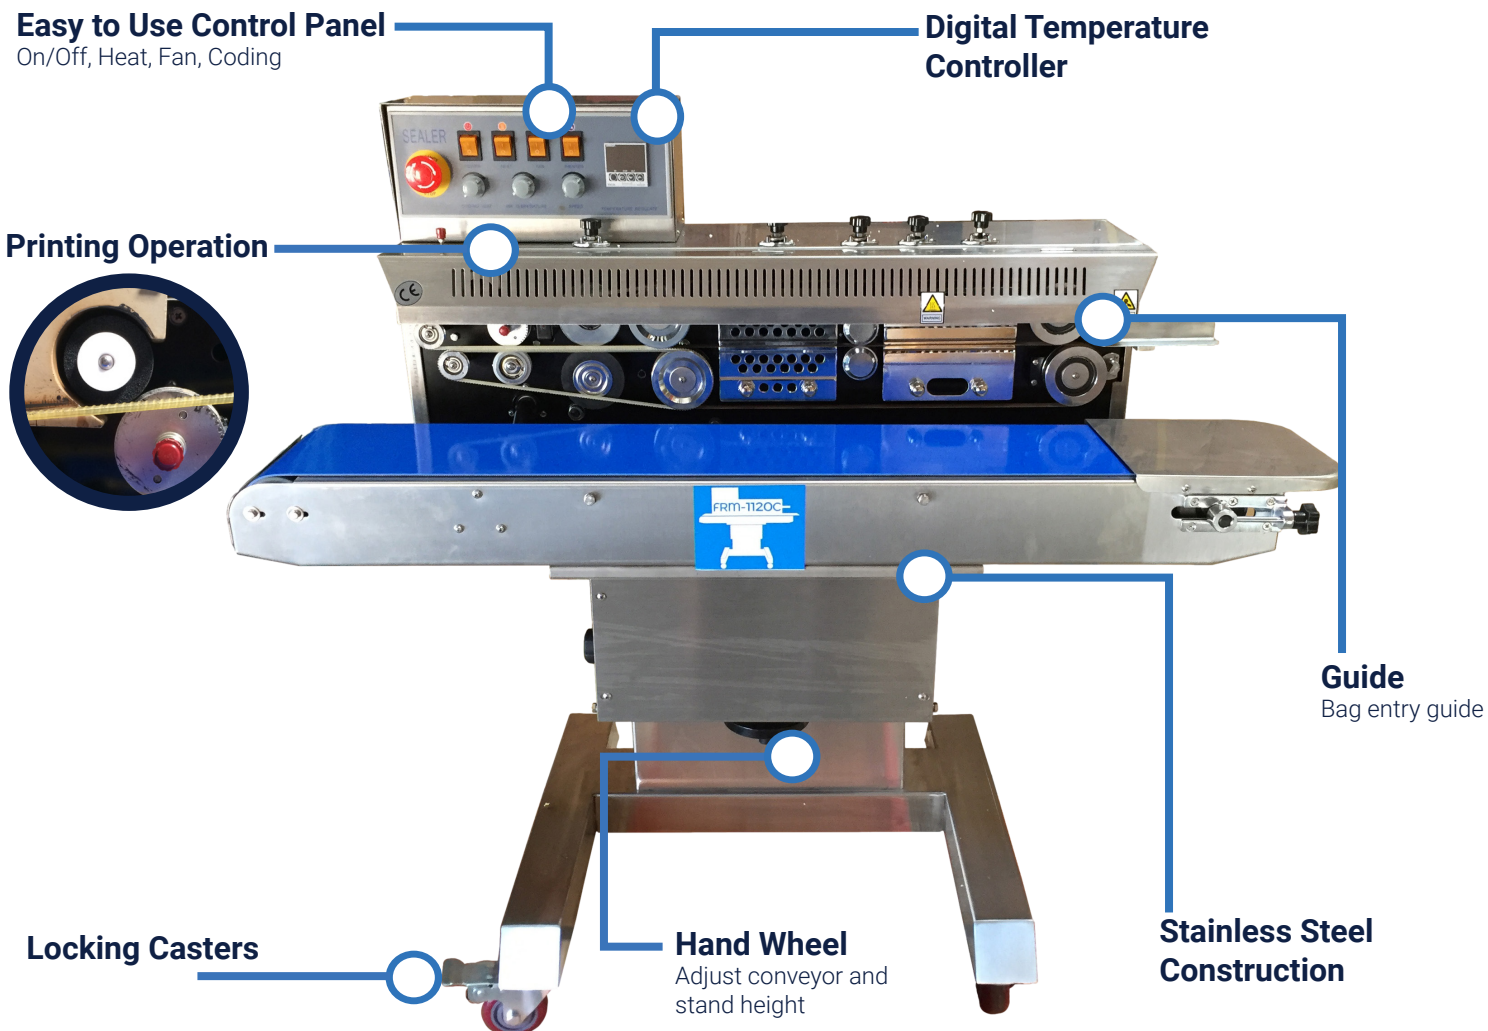

SPECIFICATIONS
