For a reliable, convenient solution to manage smaller packaged and shrink-wrapped products as they exit your machine, consider our **Lazy Susan Product Accumulating Turntable**. The turntable offers adjustable speeds from 0 to 12 rotations per minute, allowing you to fine-tune the pace to suit your needs.

This works as an ideal alternative to conveyors—where smaller items might fall through. The lazy susan turntable easily plugs into any standard 110-volt outlet. The turntable is built with high-quality bearing rollers for smooth, consistent spinning, while adjustable leveling bolts make it compatible with any conveyor line height.
