

Ideal for labs – Seal 3 Tubes at a Time

- Seals up to 3 tubes at a time of 1-3/8" diameter, varies tube by tube
- Easy to adjust with superior timing control (increments of 10th of a second)
- Double force on seal bar
- Easy maintenance resulting in lower downtimes
- Quieter operation and no metal shavings
- Accommodates different tube heights and widths (max diameter 2" OD, 8.5" height)
- Even pressure across seal length
- External compressor (60psi) required (self-contained option available)

MADE IN THE USA

More Details:

UHSS -8 tube sealers are ideal for laboratories, research facilities, R&D, and quality control groups. Unit is economical, safe, and very easy to use. The tube sealers can be used on all polyethylene, and laminated tubes. Sealers are equipped with an adjustable stainless steel shelf with height gauges to allow for easy changeover of various height tubes.

Options:

- Self-contained compressor
- 3/8" wide seal
- Dual heating elements
- 220V
- Water cooling

Specifications:

Seal Length:	8"
Seal Width:	1/4" (6mm)
Electrical	115V / 10amps
Air Consumption:	60psi
Dimensions:	13" x 15" x 15"
Weight:	45lbs

Features:

- 8" seal length
- Optional dual heating elements (highly recommended)
- Dual digital timer
- Dual cylinder
- Clevis pin
- Delrin bushing
- 1/4" wide single seal element (dual option available for better seal quality)
- Only 0.0015 seal jaw deflection
- Heavy duty power coated steel frame
- Adjustable heating and cooling times
- Exhaust port
- Air in port
- Detachable power cord
- Made and designed in the USA
- Tube tray custom made to your tubes (sample tube required for fabrication)
- Manufacturers kit includes: (1) heating element, (2) Zone PTFE over the element, (1) fuse

Available Accessories:

- Spare parts kits
- Additional tube trays
