- **Durable** - stainless steel construction
- **Right to left feed**
- **Optional features available**

Video Demo →

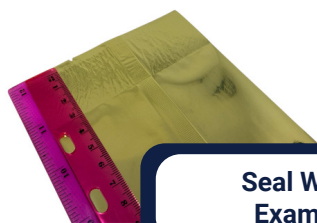

The latest addition to our CBS-880 series, the **CBS-880-30mm** features a wider 30mm (1.18") seal, perfect for bags with hang holes. Its unique design ensures seals both below and above the hang hole, effectively preventing leakage. Available in both horizontal and vertical configurations, this sealer offers flexibility for various applications.

Built with durable stainless steel, the CBS-880-30mm is ideal for sealing all types of thermoplastic materials and is well-suited for industries like food, medical, and cosmetics. With a fast warm-up time and a sealing speed of 20–30 poly bags per minute, it's an excellent choice for small businesses seeking efficient production.

To ensure long-term reliability, a spare parts kit is included.
